Working Globally but with Regional Presence

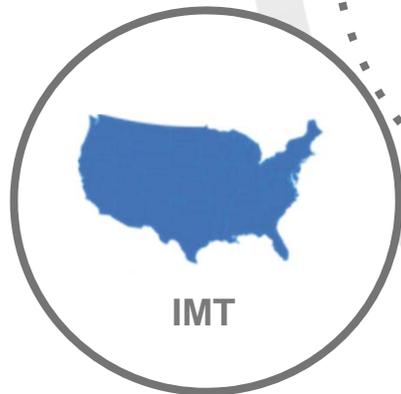

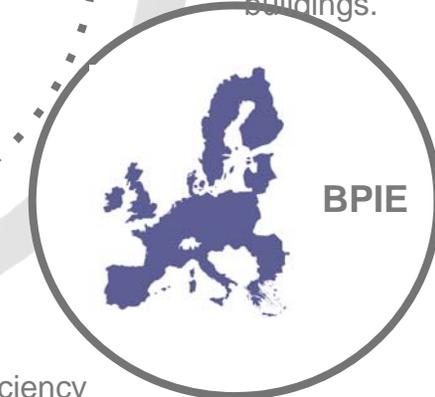

Building Policies for a Better World

Transforming

Policies and markets

GBPN

Global Center

Harvesting best practices policies in building energy efficiency and performance.

Conducting cross-cutting research and analysis

Connecting regional institutions, and share the best thinking building energy and GHG policy.

Communicating progress toward achieving the GHG abatement potential of the building sector

Advancing policies and programs that promote low carbon, energy & efficient buildings.

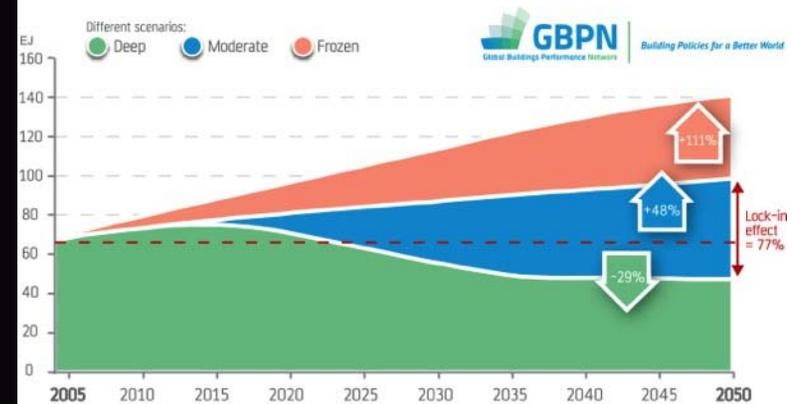

Offering world class energy efficiency expertise to policy makers and business leaders

Large Risks at Stake Need for Fast Action

Limiting climate change to 2 degrees

Buildings account for more 1/3 of emission

Going Deep

*“Acting Deep means dramatically upscaling the development of **state-of-the-art buildings** that can follow the Deep Path towards energy and related CO₂*

reductions from Buildings in each

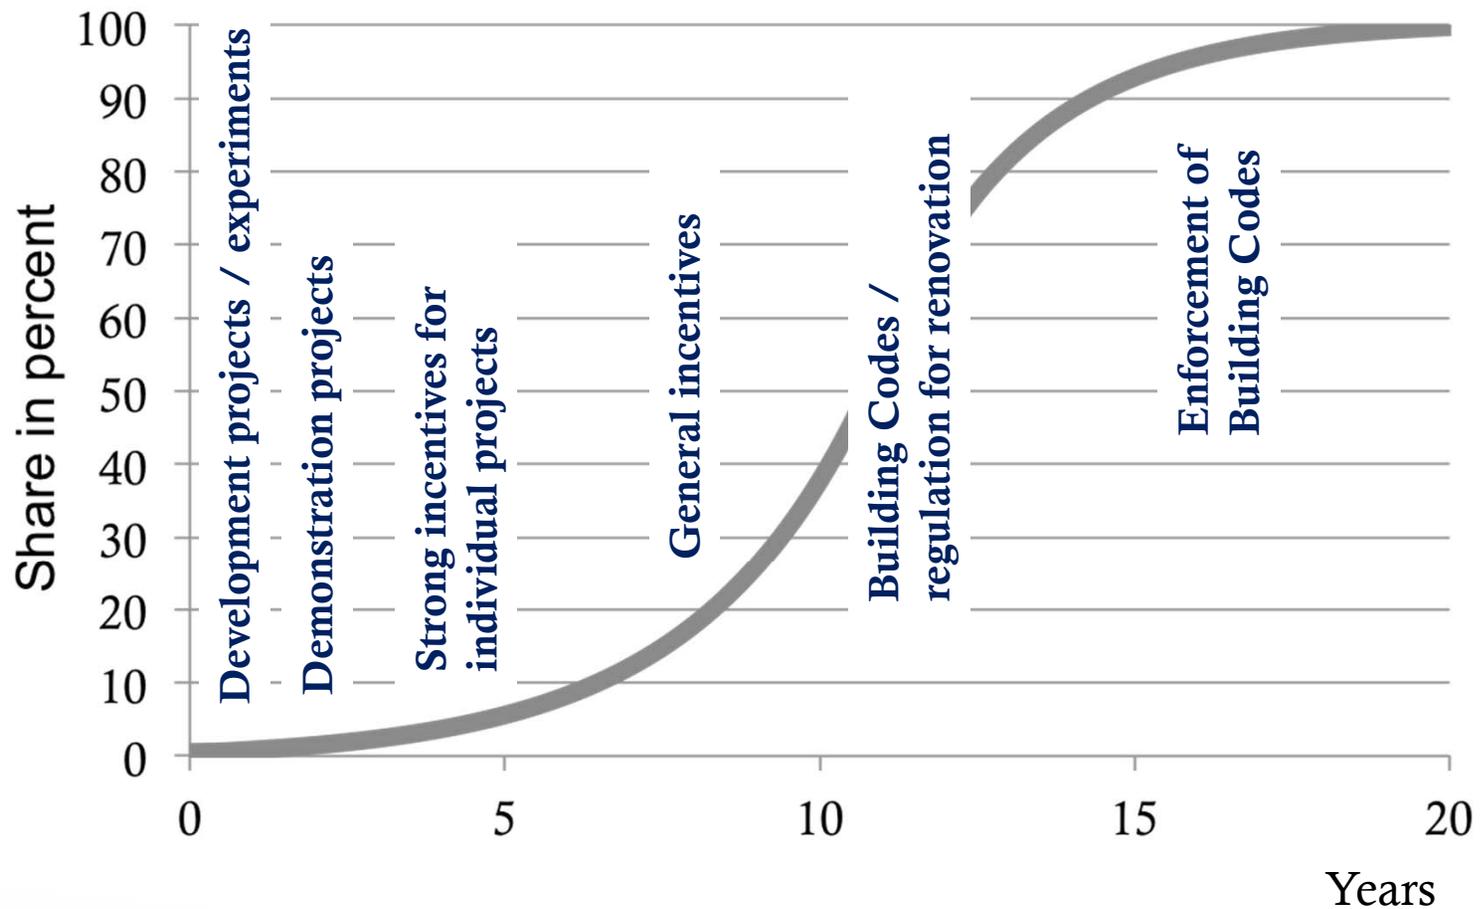

Buildings account for:

→ **30% to 40%** of total world's final energy demand

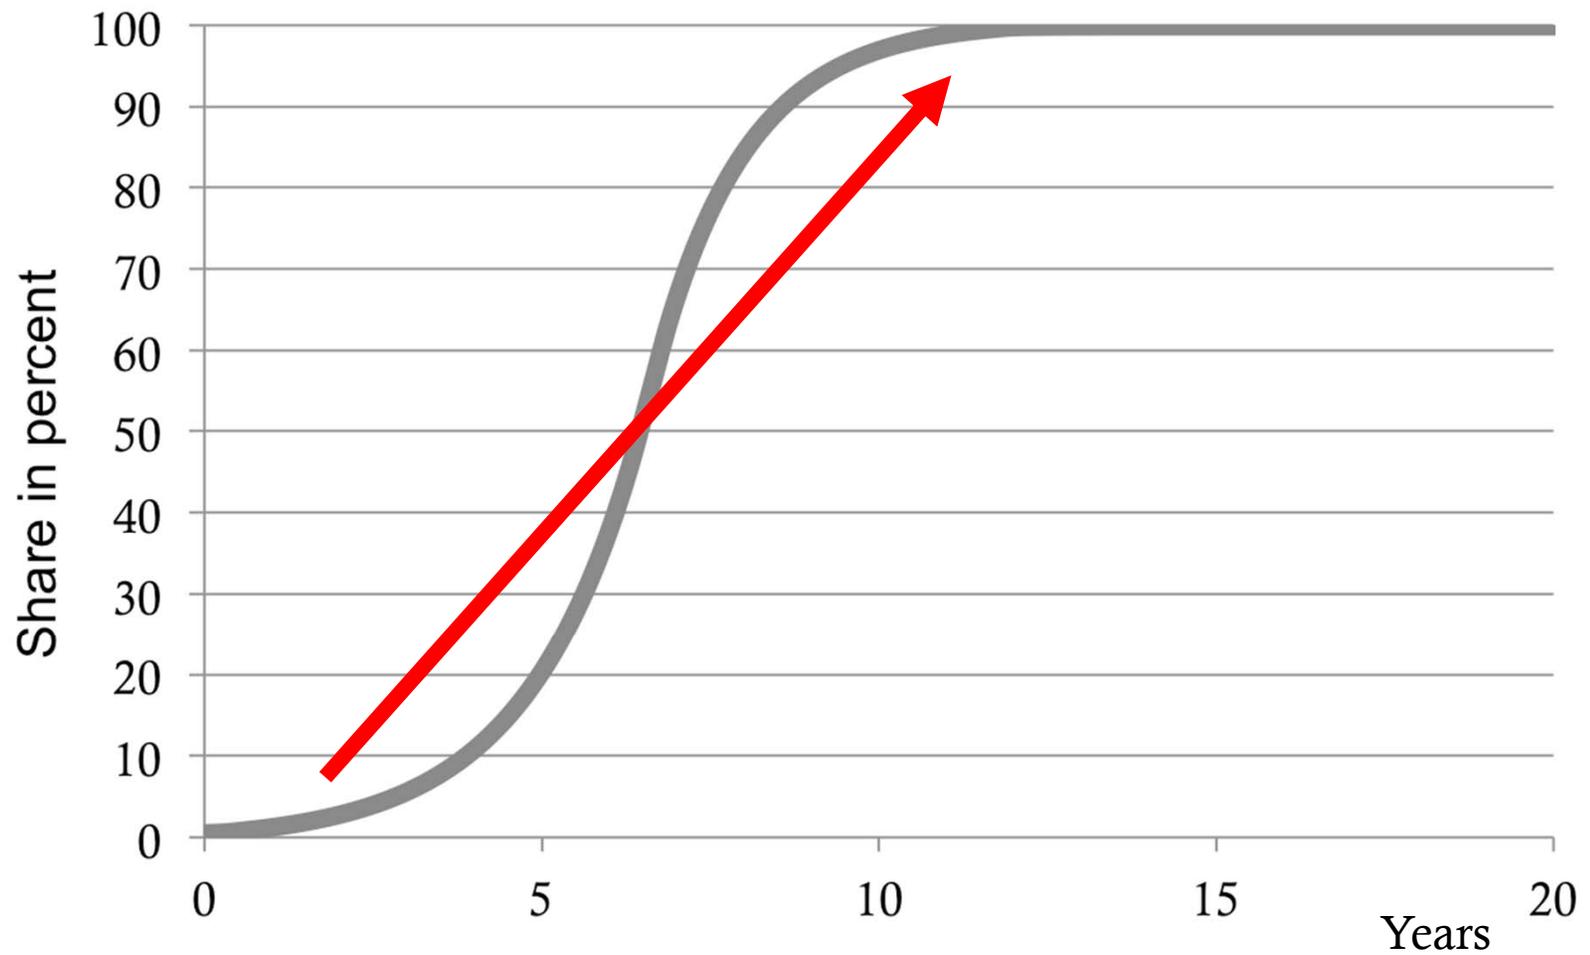

→ **more than 30%** of all energy-related CO₂ emissions.

More than 60% of global final building energy use in 2005 come from the 4 priority GBPN regions (China, Europe, India and the United States).

Implementing Deep Scenario

Implementing Deep Scenario

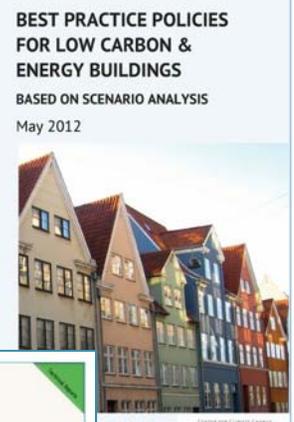

Influencing Policy Development With Information on Best Practices

Where are the best policies?

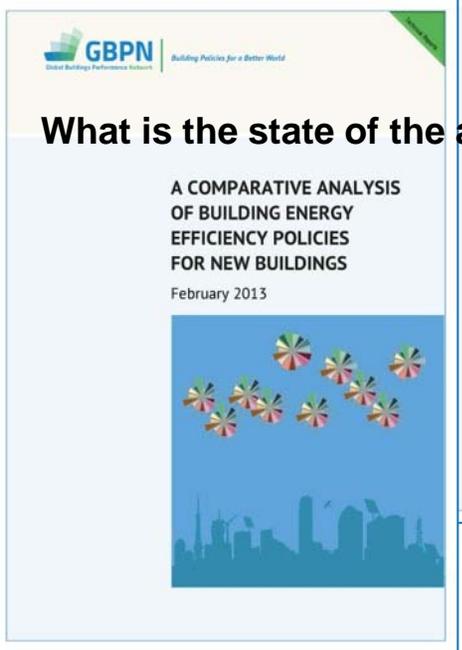

Where are the 'savings'?

What's happening in Asia?

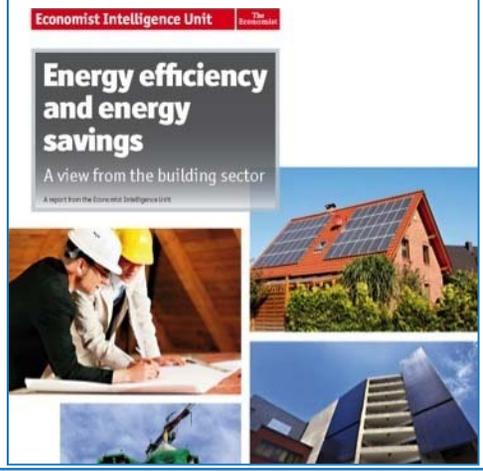

What is the state of the art?

Where is the Data?

What does business think?

Background

*“On-going research to
Up Scale Deep
Renovation –
Existing Building
Milestone for the GBPN”*

- Report - “What is a deep renovation”?
- Developed - set of state of the art criteria for an energy renovation policy package
- Interactive online renovation policy package comparison tool
- Webinar series on “how to” implement a successful policy package
- Paper- practical implementation and development guidelines

Overview

- Rationale
- GBPN Policy Comparative Tool for Existing Buildings
 - Methodology
 - Key results
- Overall Performance –success story of two front-runners in Energy Renovation Policies
- Upcoming webinars [9](#)

Rationale for Webinar Series

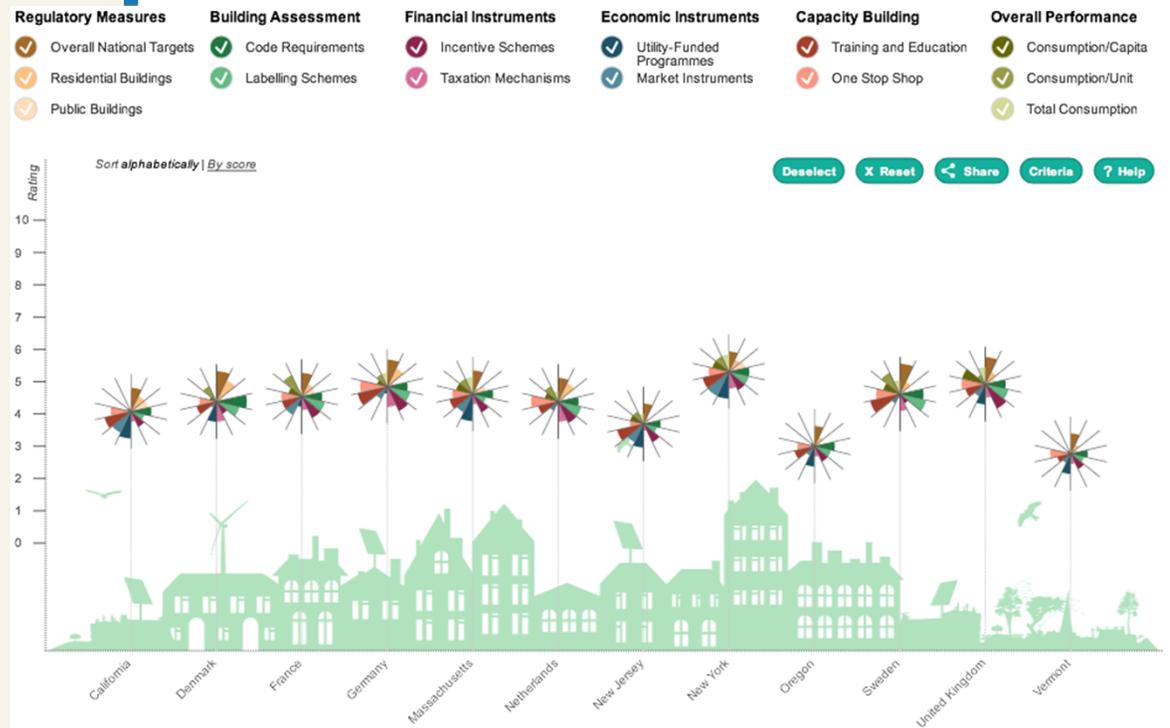

“How to” develop best practice building energy renovation policy packages?

Webinar series sets out to explain:

- How have countries practically implemented such best practices?
- What challenges and opportunities have been faced?
- What are the key lessons learned?
- Key drivers and success factors for going deep?
- How can these best practices be transferred?

GBPN Policy Comparative Tool

- Identifies 6 key themes and 14 elements in a state of the art policy package
- Analyses and compares 12 best practice renovation policy packages

Methodology – State of the Art Criteria

Regulatory Measures	Building Assessment	Financial Instruments	Economic Instruments	Capacity Building	Overall Performance
✓ Overall National Targets	✓ Code Requirements	✓ Incentive Schemes	✓ Utility-Funded Programmes	✓ Training and Education	✓ Consumption/Capita
✓ Residential Buildings	✓ Labelling Schemes	✓ Taxation Mechanisms	✓ Market Instruments	✓ One Stop Shop	✓ Consumption/Unit
✓ Public Buildings					✓ Total Consumption

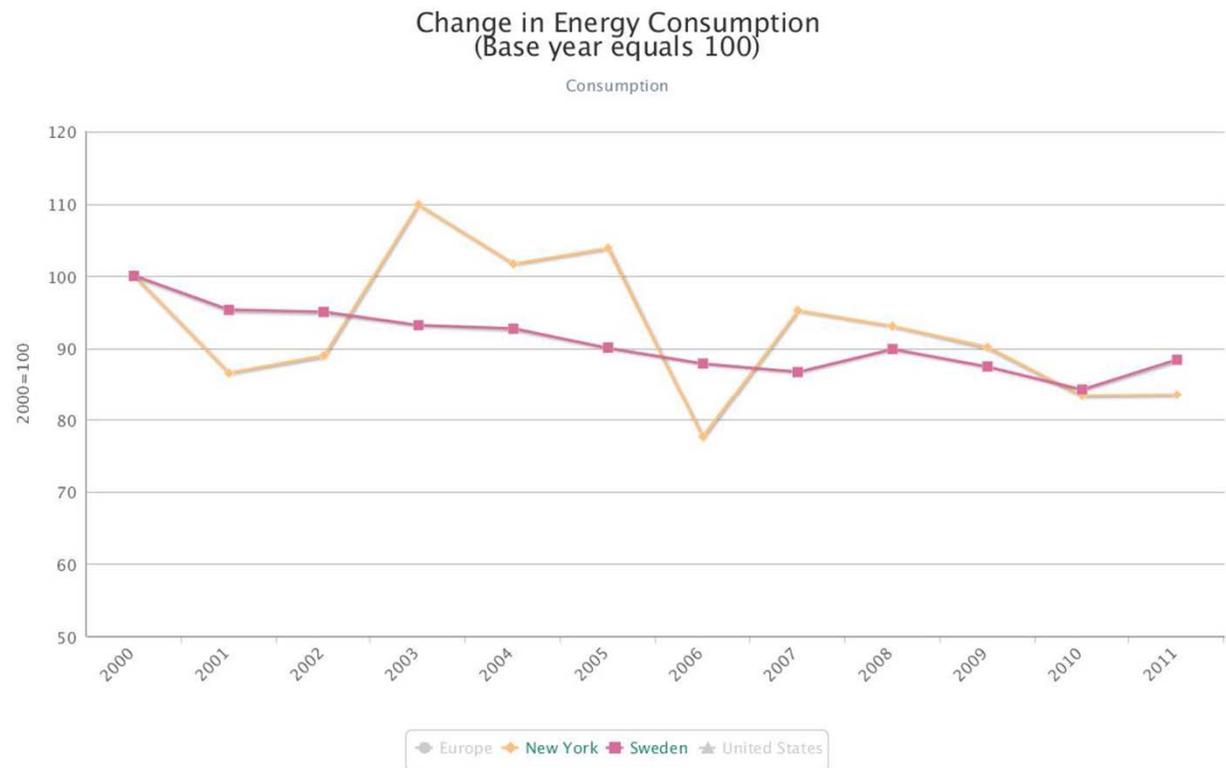

- Literature Review
- Expert Input
- Peer review process

New York	Sweden
Regulatory Measures 5 Overall National Targets 3 Residential Buildings 4 Public Buildings	Regulatory Measures 8 Overall National Targets 3 Residential Buildings 1 Public Buildings
Building Assessment 5 Code Requirements 5 Labelling Schemes	Building Assessment 6 Code Requirements 7 Labelling Schemes
Financial Instruments 5 Incentive Schemes 4 Taxation Mechanisms	Financial Instruments 2 Incentive Schemes 4 Taxation Mechanisms
Economic Instruments 7 Utility-Funded Programmes 7 Market Instruments	Economic Instruments 0 Utility-Funded Programmes 2 Market Instruments
Capacity Building 7 Training and Education 5 One Stop Shop	Capacity Building 8 Training and Education 6 One Stop Shop
Overall Performance 4 Consumption/Capita 4 Consumption/Unit 4 Total Consumption	Overall Performance 4 Consumption/Capita 6 Consumption/Unit 3 Total Consumption

Methodology – Identifying Best Practice Jurisdictions

Regulatory Measures	Building Assessment	Financial Instruments	Economic Instruments	Capacity Building	Overall Performance
● Overall National Targets	● Code Requirements	● Incentive Schemes	● Utility-Funded Programmes	● Training and Education	✓ Consumption/Capita
● Residential Buildings	● Labelling Schemes	● Taxation Mechanisms	● Market Instruments	● One Stop Shop	✓ Consumption/Unit
● Public Buildings					✓ Total Consumption

- Literature Review
- Expert Input
- Consumption Analysis
- Peer Review

Key Findings from the Tool

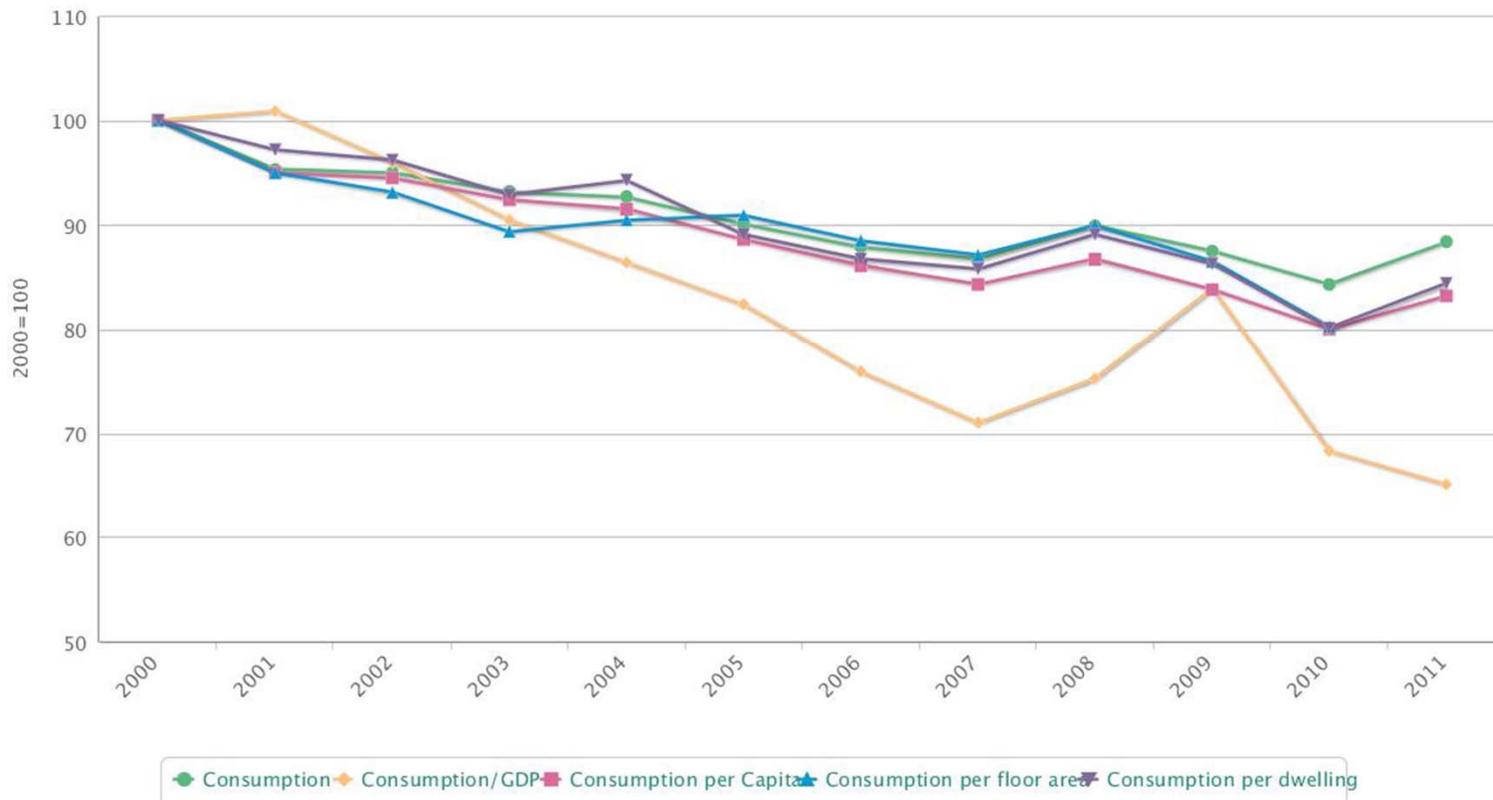

1. Emerging field.
2. Holistic policy packages in place
3. There is no such thing as an overall “best” policy package
4. Financial mechanisms need to be locally adapted
5. Absence of clear and ambitious targets for renovation

Webinar 1: Overall Performance

Change in Energy Consumption
(Base year equals 100)

Sweden

Webinar Series

- Webinar 1: How can we realise a reduction in energy consumption in the building sector using best practice policy mechanisms?
- Webinar 2: Are energy saving targets and regulatory measures essential elements in a renovation policy package?
- Webinar 3: Do labelling and certification schemes lead to greater energy reduction in the existing building stock?
- Webinar 4: How can we finance energy renovations? Insight from best practice jurisdictions on Incentives and Drivers.
